SUMMARY

I am a passionate full-stack software engineer experienced in building robust web and mobile applications. With expertise in front-end and back-end development, I excel at creating intuitive user interfaces and efficient server-side solutions. I am a strong advocate for clear communication and thrive in collaborative team environments. By staying updated with industry best practices, I consistently deliver high-quality software solutions that make a meaningful impact.

EXPERIENCE

FREELANCER.COM

Fullstack Software Engineer | July 2022- April 2023

- Utilized various programming languages and frameworks to build robust software systems.
- Designed and implemented responsive and user-friendly web applications
- Collaborated with other developers to build projects
- Fixed bugs in existing systems.
- Managed version control and utilized tools like Git for efficient code collaboration

TheJitu

Fullstack Software Engineer Intern | April 2023 - June 2023

- Implemented user-friendly web applications using Angular and Nodejs
- Designed responsive designs using Figma
- Utilized Jest to write unit tests

TheJitu

Fullstack Software Engineer | July 2023 - Now

- Implemented user-friendly web applications using Angular and Reactjs
- Implemented robust backend solutions leveraging .NET and NodeJs
- Utilized Docker for containerizing projects optimizing development workflows and ensuring seamless deployments

EDUCATION

Karatina University | 2018 - 2022

Bachelor of Science in Computer Science
Acquired expertise in programming languages, data structures, algorithms, and software development methodologies.

SKILLS

- Angular, Reactjs, Django, Nodejs,Javascript, TypeScript, MongoDb, Mssql, Jest, Git, Python,Docker
